

Open Position

Environmental Sustainability Consultant / Project Manager

As an Environmental Sustainability Consultant / Project Manager at <https://www.e-a.earth/>) you will play a pivotal role in guiding our clients towards a more sustainable future. You will lead and execute projects related to environmental sustainability, greenhouse gas emissions reduction, and sustainable business practices, ensuring that our clients meet their sustainability targets and align with global best practices. This role requires expertise in GHG Protocol, SBTi (Science-Based Targets Initiative), NZI (Net-Zero Initiative), LCA as well as strong client management and team leadership skills.

KEY RESPONSIBILITIES :

1. Client Management :

- Serve as the primary point of contact for assigned clients.
- Understand client needs, goals, and objectives related to sustainability and environmental initiatives.
- Provide expert advice and recommendations to clients on sustainability strategies and actions.
- Maintain strong client relationships and ensure client satisfaction.

2. Project Leadership :

- Lead and manage sustainability projects from initiation to completion.
- Develop project plans, timelines, and budgets.
- Monitor project progress and ensure deliverables are met on time and within scope.
- Identify and mitigate project risks and issues.

3. Environmental Sustainability Expertise :

- Utilize in-depth knowledge of GHG Protocol, SBTi, NZI and LCA to guide clients in setting and achieving sustainability goals.
- Conduct greenhouse gas emissions assessments and develop strategies for emissions reduction.
- Stay updated on industry trends and best practices in environmental sustainability.

4. Team Management :

- Manage and mentor a team of sustainability analysts.
- Delegate tasks and responsibilities effectively.
- Provide guidance and support to ensure the team's success in delivering high-quality work.

QUALIFICATIONS :

- Bachelor's or Master's degree in Environmental Science, Sustainability, Business, or related field.
- Proven experience in environmental sustainability consulting or related roles.
- Strong knowledge of GHG Protocol, SBTi, and NZI.
- Excellent project management skills, including the ability to manage multiple projects simultaneously.
- Proficiency in data analysis and sustainability reporting.
- Exceptional communication and presentation skills.
- Client-focused mindset with the ability to build and maintain strong client relationships.
- Leadership experience, including managing small teams of analysts.
- Strong problem-solving and critical-thinking skills.
- Certification in sustainability-related disciplines (e.g., LEED, CSCP) is a plus.
